Your recommendations for improving the quality of education and Erasmus student experience at NSA:

In Pediatrics we mostly had classes in Bulgarian, one of the students was trying to translate to us, but it was not still very informative because the student could not translate everything obviously but practices was very interesting and met a lot of patients with different kinds of disabilities and disorders. I am mostly satisfied with neurology with Mr. Vladislav Bonev, he is very encouraging and enthusiastic. It was my pleasure to work with him. He taught us a lot and I hope we will continue our friendship and partnership as well. And lastly, our Erasmus+ coordinator Mrs. Miroslava is the best! Thank you for everything you have done for us!

"Communication with professors is really great. Erasmus officials' response is really fast and great. Only the worst condition for me was the dormitory. The dormitory is in really bad condition, there are no curtains, no separate kitchen, even after replacing the windows they did not repair the empty walls inside the rooms and because of that it is very cold at night. I even think it would be better not to charge us anything for staying in this dormitory because the conditions are really not good.

I am very grateful to my dear supervisor Miroslava and the other professors who always gave me positive energy and communicated with me quickly, but they are not responsible for the dormitory."

I would recommend to have more individual classes in English because on some subjects Erasmus students are attending classes with Bulgarian students and teacher can't manage to translate everything for us

nothing ,, everything is good and I have a nice and new experience at NSA .. thanks

Set a regular timetable and not changing it every week

Dormitory was so bad in every way.

I would say that dormitory needs to improve a little bit to be on level with other facilities and overall experience in NSA
